E25A - 2MP Wi-Fi PT Camera

720P
Standard Security Camera

1080P
Using the CP Plus Ezykam+ Camera 360

1080P Full HD Video

Designed to represent an enhanced picture quality in full HD video so that every detail can be viewed with vivid clarity and a pixilated video feed can be avoided.

360° View

The camera rotates full 360°, making it convenient for you to view the room from every angle and keep an eye all over the place even when you are away from home.

Motion Detection Alerts

This camera detects movements in the video frame and send alerts in real-time to always keep you notified about what's happening at home.

Supports Motion Tracking

Whenever unexpected motion is detected in the video frame, the camera has been devised to rotate automatically to track the movement of people and record it to investigate later.

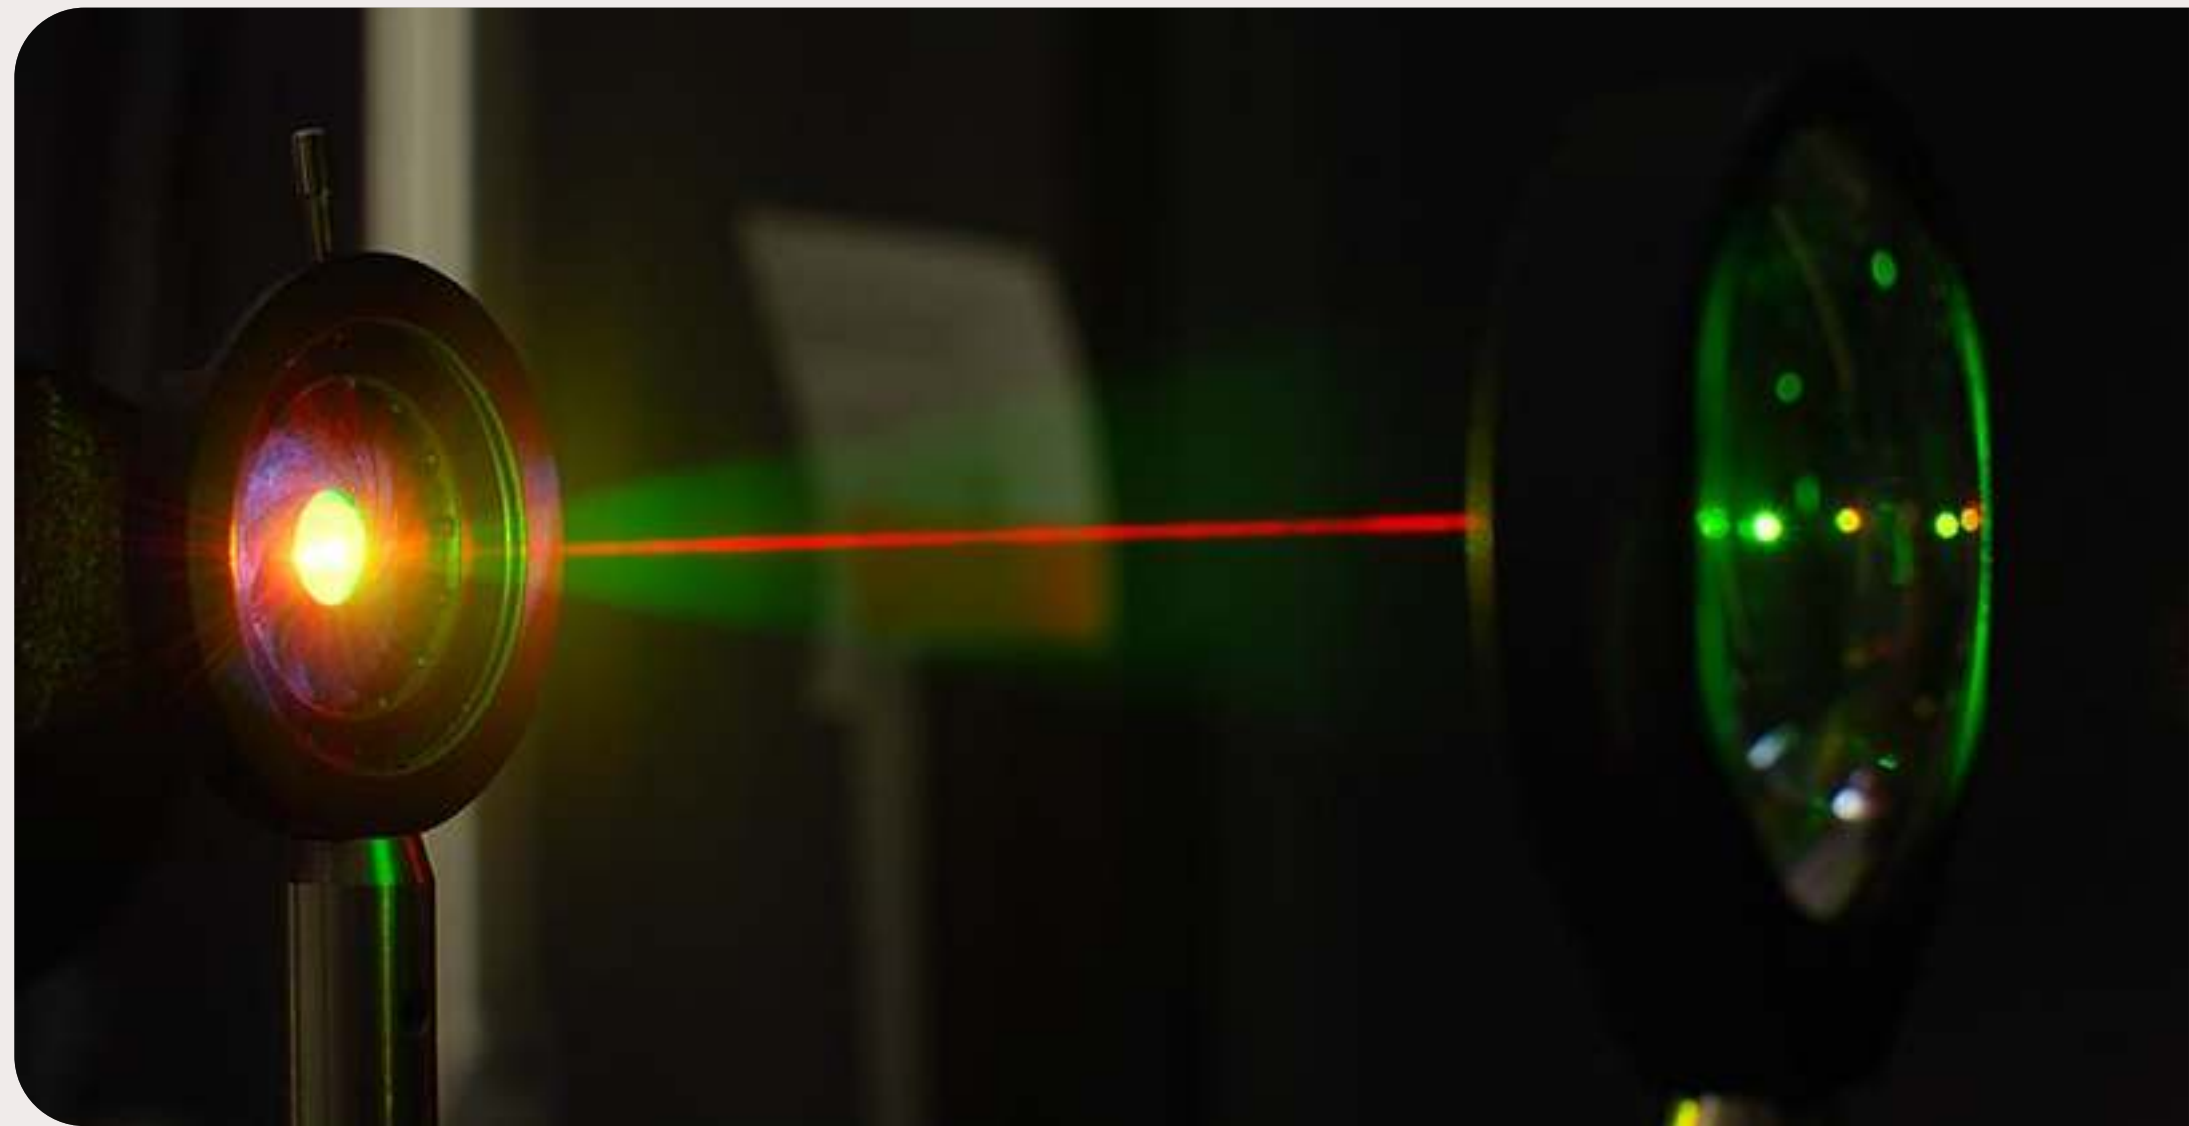

Privacy Mode

Using privacy mode, you can block the camera view & recording of a specific area of your choice to maintain privacy.

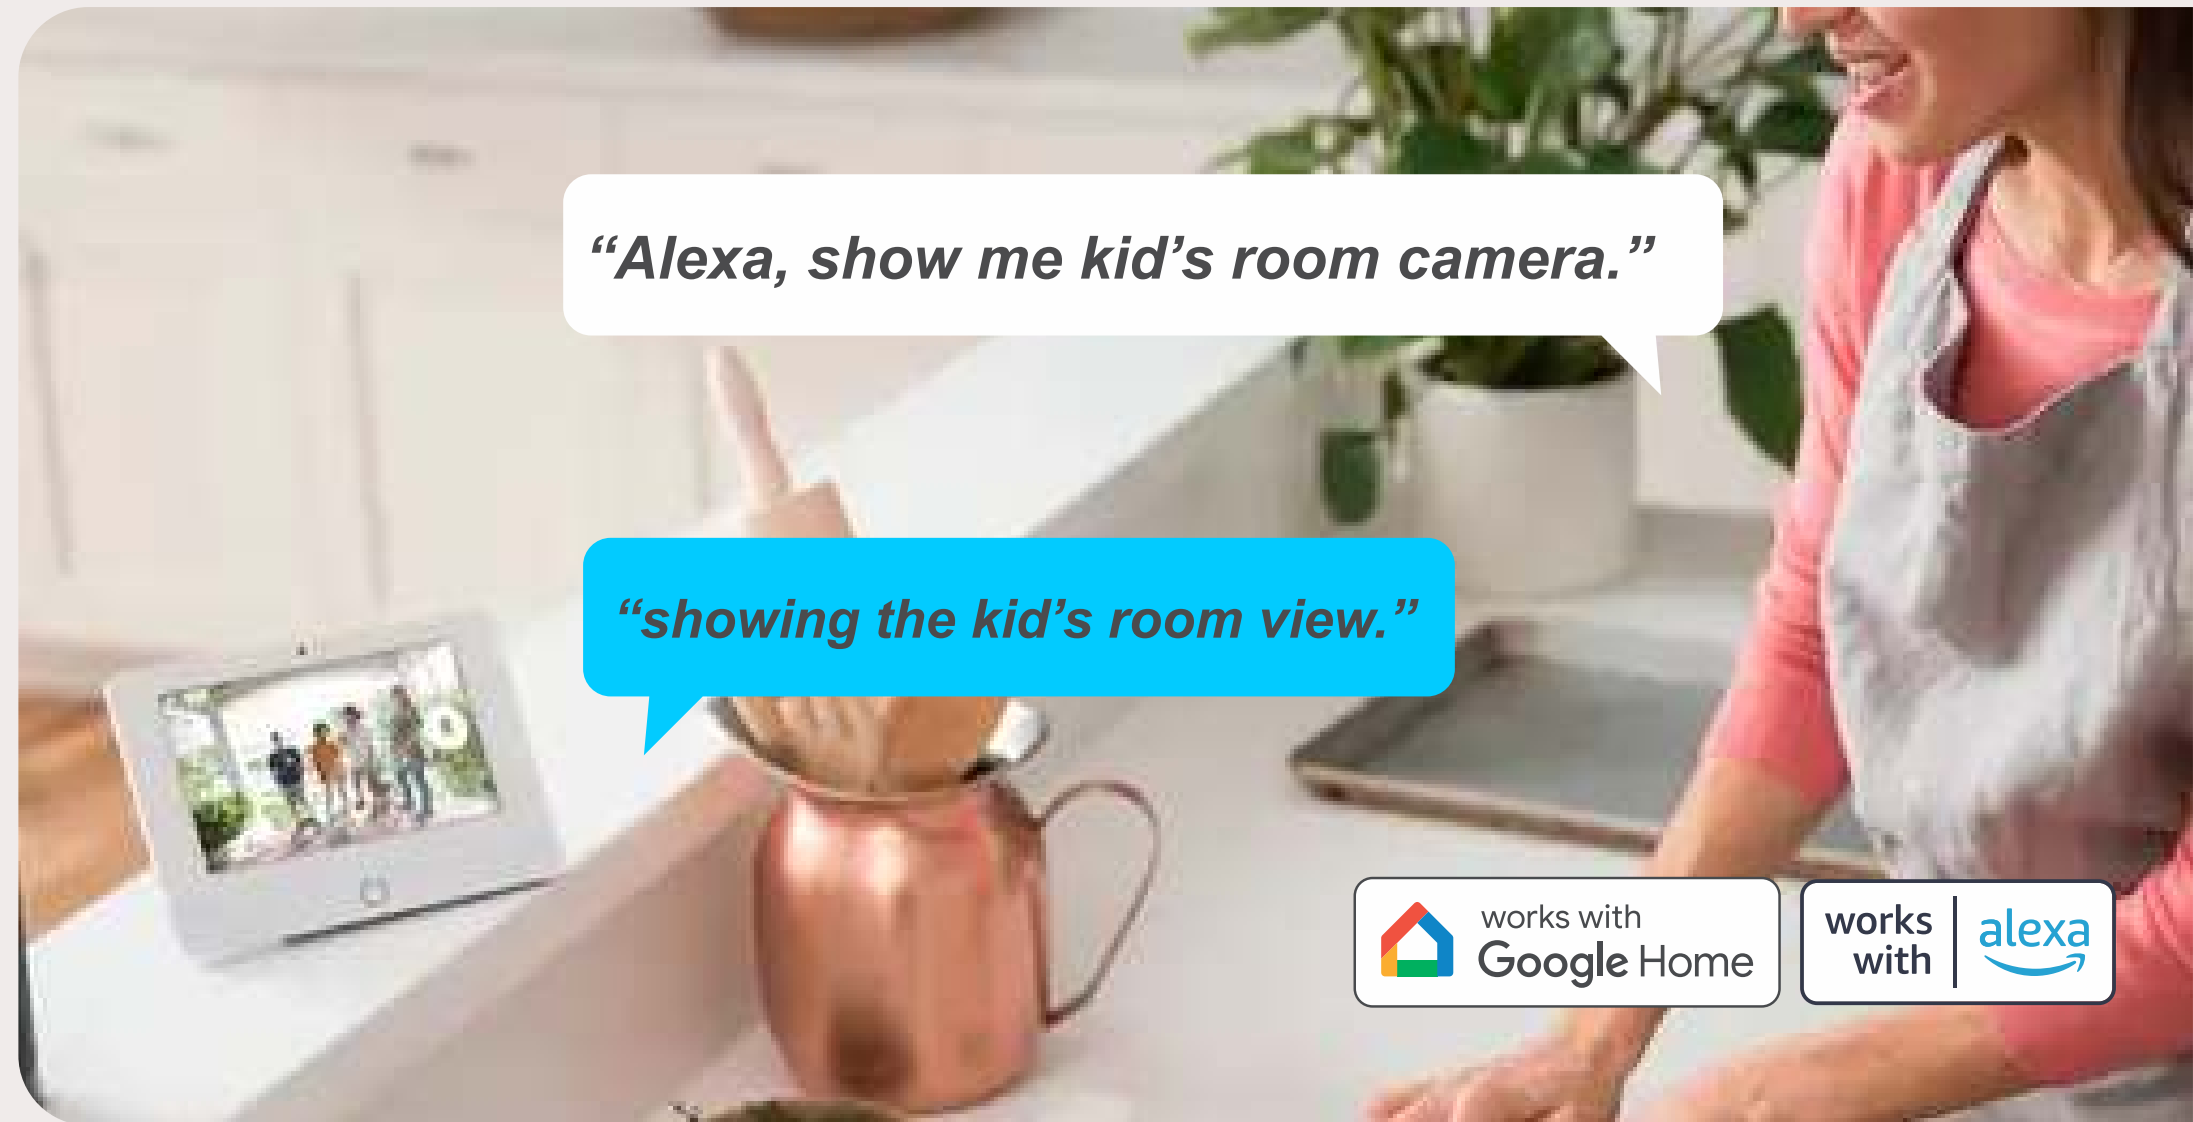

IR Lights

In areas of low illumination &/or dark places, infrared lights help to present a clear video feed even at night, increasing and enhancing the visibility of the lens to capture every detail.

Alexa and Google Supported

The CP PLUS EzyKam+ also works with both Alexa & Google Home, which lets you integrate your surveillance solution with your smart home system, meaning that with a simple voice command, you can now view your camera feed live on TV or smart phone.

"Alexa, show me kid's room camera."

"showing the kid's room view."
