Consumer Series

Home Wi-Fi Cloud camera

Intelligent security gives you peace of mind knowing your family is safe and secure

A high-definition, Ok-Google & Alexa-enabled, plug-and-play Wi-Fi camera range by the name of EzyKam launched by CP PLUS is the most trusted solution for making homes smarter in India.

With a multitude of superior features including two-way communication, cloud monitoring, face recognition, mobile surveillance, remote monitoring, and in-built memory card support, the Ezykam range is enabling proficiency in surveillance that has been lacking for decades.

Perfect for home, office, or shop, the EzyKam range offers the most revolutionary smart home solutions to bring ease and comfort to your life with a sense of security you can truly rely upon.

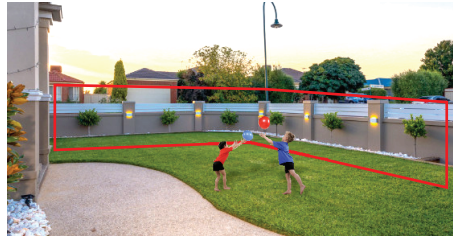

MAIN FEATURES

Vehicle Detection

Offering precise vehicle detection to ensure real-time monitoring and maintain complete security in housing complexes and large offices for enhanced protection against intruders.

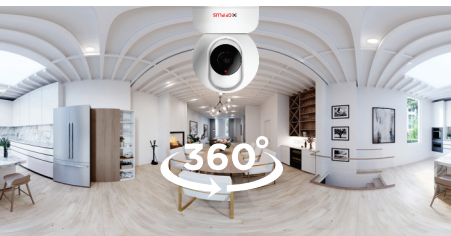

Crossline Detection

With advanced crossline detection, EzyKam cameras intelligently identify boundary breaches, providing instant notifications and reinforcing perimeter security for comprehensive surveillance solutions.

High Resolution Wi-Fi Camera

Designed to represent an enhanced picture quality with up to 8MP camera so that every detail can be viewed with vivid clarity and a pixelated video feed can be avoided.

360° View

The camera rotates full 360°, making it convenient for you to view the room from every angle and keep an eye all over the place even when you are away from home.

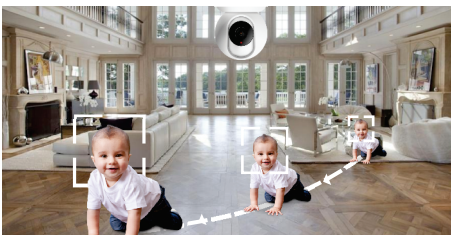

Abnormal Sound Detection

Detects abnormal and unusual sounds to send real time alerts and enable you with complete control.

Human body Detection

Designed to provide human detection and intelligent alerts, which means only being alerted only when the need occurs as the camera detects people as opposed to animals, passing vehicles, or other inanimate moving objects.

Supports Motion Tracking

Whenever unexpected motion is detected in the video frame, the camera has been devised to rotate automatically to track the movement of people and record it to investigate later.

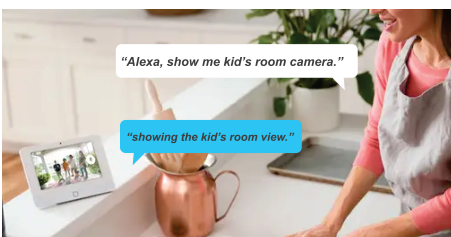

Privacy Mode

Using privacy mode, you can block the camera view & recording to maintain privacy.

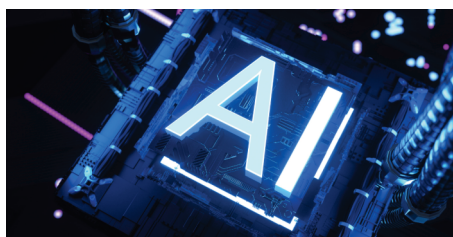

View & Talk

Enables you to stay in touch with your loved ones from anywhere, meaning you can also talk while viewing the live video feed on the phone.

Alexa and Google Supported

The CP PLUS EzyKam also works with both Alexa & Google Home, which lets you integrate your surveillance solution with your smart home system, meaning that with a simple voice command, you can now view your camera feed live on TV or smart phone.

AI-Enabled Analytics

Provides artificial intelligence powered smart analytical tools to make your surveillance footage even smarter by predicting threats and enabling better intelligence in the video feed.
